Comparative Investment Performance Versus Russell/Mellon Universe of US Small-Cap Managers

I have enclosed the comparative investment performance results of the VBA US Pension Fund Composite in the Russell/Mellon Analytical Services ("Russell/Mellon") Universe of US small-cap equity managers. Also enclosed is the risk/reward chart showing the VBA US Pension Fund Composite versus a universe of 205 US Small-Cap portfolios as evaluated by the Frank Russell Company.

VBA's US Pension Fund Composite ranks in the 40th percentile in investment performance results of US small-cap equity managers for the six years ended June 30, 2006, and in the 98th percentile in investment performance results of US small-cap equity managers for the one year ended June 30, 2006.

VBA's recent 98th percentile investment performance results are due to the fact that cyclical, material and energy sectors, which are highly volatile and unpredictable long term, are accounting for more than 50% of the return for the Russell 2000 Index for the year 2005, and also represent a substantial percentage year-to-date.
